# WORLD AUTISM AWARENESS DAY

April 2, 2015

## DID YOU KNOW THAT...

Autism, or Autism Spectrum Disorders (ASD) affects the way the brain processes information, and often prevents individuals from understanding what they see, hear and otherwise sense, resulting in difficulties in social relationships, communication, and behaviour.

Symptoms of autism can range from a mild social and learning disability to a severe impairment.

Some children with autism do not ever develop speech, some rarely use language to communicate, and some can go on to graduate from college.

Autism shows no social, educational, economic, caste, or religious bias.

## PARENTS!

Autism is a complex condition. If you suspect that your child may have autism, start intervention right away. Don't wait for your child to be 'older' or till she/he receives a diagnosis.

## PROGRAMMES

### Planet Autism : Art Exhibition

Come and join us for the Exhibition and sale of canvasses by artists on the Autism Spectrum from all over the country

**Venue** : Open Palm Court, India Habitat Centre, New Delhi
